In the process of becoming "THE BEST" from "GOOD" with maximum potential.

WORK EXPERIENCE

Isourse Technologies Pvt. Ltd. | Software Engineer
August 2021 – Till Date

- Proved to be successful to complete work within tight deadlines and a fast paced environment by applying effective time management techniques.
- Worked well in a team setting as leader, providing support and guidance enabling members to always maintain the sprit of the team.

HRMS : A computerized system that automates various HR processes, starting from onboarding to offboarding. By going paperless, this system eliminates the need for paper-based documentation, making HR processes more efficient and environment-friendly. The system also includes features such as attendance management, payroll processing, and task management, along with a predictive data analysis model, which allows HR personnel to easily track employees' performance and manage HR-related tasks.

HYPERLOCAL : A system that allows for fast and efficient delivery of goods, which includes several features designed to streamline the delivery process, including store and rider onboarding modules, electronic background verification (e-BGV), geofencing, and order management. Store and rider onboarding modules allow businesses to quickly onboard new stores and riders. e-BGV simplifies the process of checking the background of riders and employees. Geofencing allows businesses to set up virtual boundaries around specific geographic areas. And, order management allows businesses to efficiently manage incoming orders.
